

GO Real-Time Lux Tracker

Temperature, location, and security

Protect your product in-transit

Combining our real-time temperature and location reporting technology with a highly sensitive light sensor, the GO Real-Time Lux Tracker detects unauthorized access to your high value assets during transit. Whether your cargo is at the border, a DOT checkpoint, or the Receiver's dock, you know in real-time when and where your shipment is being accessed as well as the temperature of your product throughout the trip. This easy to use system provides global visibility at an affordable cost and fits in the palm of your hand. Simply pull the tab to activate the device, place in a container or trailer and input the serial number into Oversight to access the shipment data in real-time.

Oversight Dashboard. Data at your fingertips.

Comprehensive and automated reporting is provided through Oversight and the Oversight Mobile app. Data is encrypted, providing security as it moves to the cloud. Information is at your fingertips while you are on the GO with Oversight Mobile. Check status and create shipments direct from a phone or tablet. View current maps, graphs, and charts of key shipments including temperature, security, and location details. Shipment summary reports include the GO Real-Time Lux serial number, trip name, current temperature, current location, trip status, trip duration, temperature range, mean kinetic temperature, total time out of range, total time above range, total time below range, and temperature graph
