

GO PDF Mini Logger

Temperature Monitoring Logger in Compact Size

Temperature Monitoring

The GO PDF Mini loggers monitor time and temperature of perishable products during distribution and storage. These easy-to-use loggers eliminate the need for reading devices and proprietary software and are optimal for applications requiring fully independent operation – simply activate and place with your shipment.

Due to their small size, the GO PDF Mini Loggers are versatile and feature a USB connection which can be plugged directly into the USB port of a computer. Once connected, the logger automatically generates a PDF file containing complete time, temperature history including graphs and summary data, as well as a complete table of all temperature readings during shipment. For added convenience, GO PDF Mini also automatically generates a CSV file.

GO PDF Mini General Use

GO PDF Mini Loggers provide basic temperature monitoring data. Loggers feature a typical accuracy range of +/- 0.5°C between -20°C to 40°C (-4°F to 104°F) over the operating range of -30°C to 70°C (-22°F to 158°F). GO PDF Mini loggers can record data for either 15, 60 or 90 days and function as a data logger only with no alerting capabilities.

Small, flat, waterproof recorder

Digitally records time and temperature data

Unique design plugs directly into USB port; generates PDF data file

Full independent operation - eliminates readers and software

Great for monitoring exports/imports and worldwide shipments
